

Amerigear Gear Couplings

Fully-crowned gear teeth provide operational benefits including maximum load-carrying capacity with minimum size, maximum reliability and long life

Ameridrives Amerigear O-Ring Seal Gear Couplings

- Fully-Crowned Gear Teeth Strong, rigid floating sleeve
 - Allow greater misalignment
 - Higher torque capacity
 - Lower contact stresses
 - Less backlash
- Precision-machined identical hubs
 - Can be reverse mounted w/std equipment for larger DBSE
- Larger bore capacity
- Positive dust-tight seals
- Conforms to AGMA standards for sizes 201.5 -207
- 3/4° to 1-1/2° operating angle

Advantages of Amerigear O-ring style coupling over metal seal style coupling

- 23% savings in labor cost per coupling installation
- 35% initial purchase cost savings
- 66% less grease used in O-ring style coupling
- 82% greater life expectancy
